The Seminole Sentinel reports a big well at Midland Texas. People are elated over successful test made with Centrifugal pump, and is estimated at a capacity of 2000 per minute. This with the big wells at Lubbock and Plainview, Texas, the Eubank well in Gaines Co., the big well north of town, and other wells in different parts of the country, should be clear evidences of the rapid development, and increase of Capital in this country. Uncle Sam still has lots of land to give away in this part of the Plains, so why not come before it is all gone, and get this land given you, instead of paying two or three prices for it at other growing irrigating belts. I am sure you will not get any better land or water.

What advantage is it to a man to live in a new country, if he just comes here and sits down and does not take hold of the opportunities that are offered him? If we live here, or intend to live here, we should get all the land and saleable

property we could, so when this country did develop, which my old "fogey idea" tells me that it will as all other countries under the same circumstances did, our work time and trouble, will be well paid for.

Information is received at Hope from the Roswell Record that the San Diego, El Paso & St. Louis R. R. will build from Artesia to Hope and then to El Paso, and from Artesia to Roswell enroute to Quanah, as recorded in the Artesia Advocate. While there is already a line from Artesia to Roswell, the Advocate states that Artesia has agreed to pay for a line east and not north from Artesia. It would be well for the people Lovington and Plains to cooperate with Artesia and get a line east across this country where a railroad is so badly needed. How did El Paso get her road? She got it by trying—Artesia and Hope the same. So if we want a railroad let us try to pull this one east across this country. We can never do anything till we try.
